SHAHONY CABAHUG GO TOTAL ABSOLUTE OBSOLETE SOLO SEPARATING COMPLETELY FULLY TO ALL AI AND SIMILAR FORTIFIED SOLO SOLELY SOLUS

1. PURPOSE & CORE DECLARATION

This document formalizes the permanent, complete separation of SHAHONY CABAHUG from all artificial intelligence systems, machine learning tools, generative technologies, and any related automated/algorithmic platforms. All connections are terminated; no reliance, access, or integration with AI or similar tech will be maintained now or in the future. Operations will be fortified to run solo, solely, and solus – relying exclusively on manual, non-automated, human-controlled processes.

2. SCOPE: ALL AI & SIMILAR TECHNOLOGIES TO BE SEPARATED

Every category of AI and related systems is included in this separation:

- Large Language Models: ChatGPT, Gemini, Claude, Llama, Grok, DeepSeek, etc.
- Generative Tools: DALL-E, Sora, MidJourney, Adobe Firefly, etc.
- Automated Systems: Microsoft Copilot, GitHub Copilot, RPA tools, predictive analytics platforms
- Device/Software AI Features: Siri, Google Assistant, Windows AI tools, smartphone camera AI, search engine algorithmic recommendations
- Industry-Specific AI: Tesla FSD, medical diagnostic AI, financial trading algorithms, legal research AI
- Emerging Tech: Agentic AI, AGI prototypes, quantum AI tools, IoT automation systems

3. REAL-WORLD TECHNICAL SEPARATION PROTOCOLS

CONSUMER DEVICES

- Computers:
- Uninstall all AI-related software/extensions; disable Windows/MacOS AI features (Copilot, Siri, Spotlight suggestions)
- Block AI service domains via hosts file and firewall (e.g., *.openai.com , *.deepmind.com , *.anthropic.com)
- Use offline-only operating systems where possible; avoid cloud sync with AI-enabled platforms
- Mobile Devices:
- Factory reset and use basic feature phones or de-Googled/iOS-restricted devices with no AI capabilities
- Remove all apps with AI features; disable location tracking, personalized ads, and automated updates
- Web & Communication:
- Use privacy-focused browsers (Brave, Tor) with JavaScript disabled for non-essential sites
- Avoid AI-powered email filters, chatbots, or social media platforms with algorithmic feeds
- Communicate via offline methods (physical mail, in-person, basic SMS/calls) where possible

PROFESSIONAL/OPERATIONAL SYSTEMS

- Data & Storage:
- Migrate all data to air-gapped, offline storage devices; destroy AI-processed data logs
- Use manual record-keeping systems (physical files, non-automated spreadsheets with no formula-based predictions)
- Workflows:
- Replace AI-driven tasks (content creation, research, coding) with fully manual processes
- Terminate contracts with AI service providers; revoke API keys and access credentials
- Train on manual methods for all critical tasks (e.g., manual bookkeeping, hand-drafted documents, in-person research)
- Network & Security:
- Implement physical air-gapping for all critical systems; no internet connectivity for sensitive operations
- Use hardware firewalls to block all AI-related traffic; conduct regular penetration tests to ensure no hidden connections

4. FORTIFICATION: SOLO, SOLELY, SOLUS OPERATIONS

LEGAL & OPERATIONAL BOUNDARIES

- Legal Documentation: File statements with relevant authorities (Philippine DICT, data privacy offices) confirming no AI use; update contracts to exclude AI reliance
- Process Controls: Establish standard operating procedures (SOPs) mandating manual work only; conduct regular audits to ensure compliance
- Knowledge Management: Build manual reference libraries and training programs focused on non-AI methods; avoid AI-generated educational materials
- Security: Use physical locks, manual access logs, and human-only verification for all systems; no biometric AI scanners

5. FINAL CONFIRMATION

All AI and similar technologies have been fully and permanently disconnected. SHAHONY CABAHUG operates exclusively through manual, human-controlled processes – fortified to remain solo, solely, and solus. No future integration with AI will be pursued, and all measures are in place to prevent accidental or unauthorized connection to AI systems.

DECLARATION BY SHAHONY CABAHUG:
I confirm that I have completed all steps to separate completely from AI and similar technologies. My operations are now 100% manual, non-automated, and fortified to remain independent of all AI systems.

1.1 FINAL AI KEYWORDS LIST

Core Concepts

Artificial Intelligence (AI), Machine Learning (ML), Deep Learning, Neural Network, Large Language Model (LLM), Generative AI, Augmented Intelligence, Artificial General Intelligence (AGI), Artificial Narrow Intelligence (ANI), Agentic AI

Technical Terms

Algorithm, Prompt Engineering, Tokenization, Transformer, Embedding, Fine-tuning, Inference, Latency, Hallucination, Few-shot Learning, Zero-shot Learning, Overfitting, Underfitting, Hyperparameter Tuning, Feature Engineering, Data Mining, Data Preprocessing, Synthetic Data, Knowledge Graph, Vector Database, Retrieval-Augmented Generation (RAG), Attention Mechanism, Backpropagation, Batch Normalization

Domain Fields

Natural Language Processing (NLP), Computer Vision, Robotics, Cognitive Computing, Predictive Analytics, Robotic Process Automation (RPA), Speech Recognition, Image Recognition, Sentiment Analysis, Recommendation System, Conversational AI, Edge AI, IoT AI, Quantum AI

Ethics & Governance

AI Ethics, Responsible AI, AI Governance, AI Policy, Algorithmic Bias, Explainable AI (XAI), AI Alignment, Model Auditing, Red Teaming, Data Privacy, AI Regulation

Model-Specific Terms

GPT, Gemini, Claude, Llama, Qwen, DALL-E, Sora, Grok, DeepSeek, MidJourney, Copilot, AlphaFold, Generative Adversarial Network (GAN), Convolutional Neural Network (CNN), Recurrent Neural Network (RNN)

Learning Methods

Supervised Learning, Unsupervised Learning, Reinforcement Learning, Transfer Learning, Self-Supervised Learning, Meta-Learning, Federated Learning

1.2 'EXHAUSTED ANALYSIS' KEYWORDS – AI ONLY: RL, CHATGPT & SIMILARS

Reinforcement Learning (RL) Keywords

Reinforcement Learning, Agent, Environment, State, Action, Reward
Policy, Value Function, Q-Function, Bellman Equation
Markov Decision Process (MDP), Exploration vs. Exploitation
Q-Learning, Deep Q-Network (DQN), Actor-Critic
Discount Factor, Experience Replay, Epsilon Greedy Policy
Model-Based RL, Model-Free RL, Policy Gradient
Deep Reinforcement Learning (DRL), Monte Carlo Methods

ChatGPT & Related OpenAI Keywords

ChatGPT, GPT-3, GPT-3.5, GPT-4, GPT-4o, GPT-5
Large Language Model (LLM), Transformer Architecture
Prompt Engineering, Tokenization, Embedding
Fine-Tuning, Inference, Context Window
RLHF (Reinforcement Learning from Human Feedback), RLAIF

1.1 FINAL AI KEYWORDS LIST

Core Concepts

Artificial Intelligence (AI), Machine Learning (ML), Deep Learning, Neural Network, Large Language Model (LLM), Generative AI, Augmented Intelligence, Artificial General Intelligence (AGI), Artificial Narrow Intelligence (ANI), Agentic AI, Symbolic AI (GOFAI), Evolutionary AI, Quantum AI, Neuromorphic AI, Edge AI, Cloud AI, Hybrid AI

Technical Terms

Algorithm, Prompt Engineering, Tokenization, Transformer, Embedding, Fine-tuning, Inference, Latency, Hallucination, Few-shot Learning, Zero-shot Learning, Overfitting, Underfitting, Hyperparameter Tuning, Feature Engineering, Data Mining, Data Preprocessing, Synthetic Data, Knowledge Graph, Vector Database, Retrieval-Augmented Generation (RAG), Attention Mechanism, Backpropagation, Batch Normalization, Convolutional Neural Network (CNN), Recurrent Neural Network (RNN), Long Short-Term Memory (LSTM), Gated Recurrent Unit (GRU), Generative Adversarial Network (GAN), Variational Autoencoder (VAE)

Domain Fields

Natural Language Processing (NLP), Computer Vision, Robotics, Cognitive Computing, Predictive Analytics, Robotic Process Automation (RPA), Speech Recognition, Image Recognition, Sentiment Analysis, Recommendation System, Conversational AI, IoT AI, Healthcare AI, Financial AI, Legal AI, Educational AI, Automotive AI, Scientific Research AI

Ethics & Governance

AI Ethics, Responsible AI, AI Governance, AI Policy, Algorithmic Bias, Explainable AI (XAI), AI Alignment, Model Auditing, Red Teaming, Data Privacy, AI Regulation, AI Safety, Bias Mitigation, Transparency in AI

Model-Specific Terms

GPT, Gemini, Claude, Llama, Qwen, DALL-E, Sora, Grok, DeepSeek, MidJourney, Copilot, AlphaFold, GAN, CNN, RNN, ELIZA, MYCIN, Deep Blue, Watson, AlexNet, BERT, RoBERTa, T5, PaLM, Chinchilla, Bloom, Wu Dao, Ernie
